| **Subject:** | Installing AutoCad Software |

AutoCad software is available to all PPD/EED Engineers and Technicians as networked software.   The following procedure describes how to install the software on your Windows NT workstation[1].  Once the software is installed, it will reside and run on your workstation; but will seek "permission" to run each time from the "key server" software located on a PPD computer.  This will be transparent to you.  There are presently three software licenses "floating".  Thus, up to three people may use the software simultaneously at any given time.    Follow these instructions carefully for a trouble free installation:

1. Log into your NT workstation in the **FNAL** domain.  You must have administrator privileges on your computer.

2. Turn off virus checking.

3. Locate **ppdserver** (you must use **Start>Find>Computer>ppdserver**). Double click on **ppdserver** and browse to **\\ppdserver\EED.PPD\Project\ESCAD\Install_Area\Autocad_2002_Network.**

4. Run the setup program by double-clicking on "**Setup.exe** ".

5. In response to the **"AutoCad 2002 Setup"** dialog box, select **"Next"**.

6. In response to the **"Software License Agreement"** dialog box, select **"I Accept"** and **"Next"**.

7. In response to the **"Serial Number"** dialog box, select **"Next"**.

8. In response to the "User Information" dialog box, select "**Next**".

9. In response to the **"Select Installation Type"** dialog box, verify that "**Full**" is checked, then select "**Next**".

10. In response to the "**Destination Folder**" dialog box, accept the proposed directory, or browse to one of your preference, then select "**Next**".

11. In response to the "**Start Installation**" dialog box, select "**Next**".

12. In response to the "**Start Copying Files**" dialog box, select "**Next**" and wait for copying to complete.

13. In response to the **"Volo View Express Welcome Window"** Dialog box, select  "**Next**" (VoloView is a DWG/DXF file viewer).

14. In response to the **"Choose Destination Folder**" dialog box, accept the proposed directory, or browse to one of your preference, then select "**Next**".

15. In response to the "**Start Copying Files** " dialog box, select **"Next"**.

16. In response to the **"Volo View Express Setup Complete"** dialog box, select **"Next"**.

- In response to the **"AutoCad 2002 Successfully Installed"** dialog box, select **"Finish"**

---

[1] The AutoCad installation manual specifies that the software will work with Windows 95, 98, NT 4.0, and Windows 2000; but I have only tested installation on Windows NT.  This note assumes Windows NT.
